

Let us release the value in your materials

Recycle | Resource | Reward

Every business has a responsibility to recycle and as one of the most dynamic recycling companies in the UK, we offer a range of environmental services to support your business needs. We work hard to identify ways in which your waste materials can be recovered and transformed into the most valuable resource for your business. And you experience the reward of getting maximum value from your materials and the peace of mind that you are handling waste in a responsible and sustainable way.

The way we do things makes a difference

In an industry known for a lot of talk, we actually deliver results. Our experienced team will always seek the best prices from end markets for recyclables, whether in the UK, Europe or the Far East. We then use our exclusive global logistics network to make sure that materials are transported in the most cost-effective way possible. These two key activities, along with our knowledge of recyclable materials, enables us to pay our material suppliers the best possible prices on an ongoing basis.

We also think it's important to make dealing with us as simple and as satisfying as possible. We place duty of care paperwork at the top of our priorities and ensure we pay for materials promptly. All materials are assessed fairly and each supplier has a dedicated account manager who will provide reports on materials collected from each site. As experts in our field, we are also able to identify the most effective recycling equipment to help you get the most from your recyclable materials.

And if there is a box (we recycle all ours), we think out of it

The bit that we're particularly proud of is the fact that we have the type of vision that really does add value to our customers - we see the bigger picture, we join the dots between your business processes and the potential routes for income, and we will always see the opportunities for innovation.

So, if you want us to release the value in your materials, just get in touch.

A handwritten signature in green ink that reads 'Matthew'.

Matthew Burton

Commercial Business Manager

Bulk material collections

- Paper and cardboard
- Plastics (HDPE/LDPE/PET/PP)
- Metals (aluminum/steel/mixed)

Other collections

- WEEE
- Hazardous waste material

Material handling equipment

- Baling equipment
- Food waste handling equipment

Food waste solutions

- Would you like to turn food waste into water?
- Sustainable profit generating food waste solutions

Carbon management

- Carbon reduction consultancy and techniques
- Green technologies
- Carbon implementation plans
